Nitric oxide synthesis 87
4-Nitro-2-(3-phenylpropylamino) benzoate (NDPB) 48
Nocadozole 516
Node of Ranvier 536
Noise analysis 159
Non-typical K^+ current 407
Noradrenergic modulation-conotoxin-sensitive Ca^{2+} channels 75
NPPB 159
N-type inactivation 354
Nucleoside diphosphate kinase 316
Nucleotide diphosphates 185

O

Oil-gated microcapsule 609
Oocyte expression system 90
Oocytes 211
Open states 506
Opossum kidney cells 516
Organic osmolytes 233
Osmolytes 233
Osmoregulation 233
Ouabain 585
Outward current 427
Outwardly rectifying Cl^- channel 159
Oximes 325
Oxygen species 404
Oxyntic cell pH 253

P

P_2-purinergic agonist 465
Pacemaker current 614
Pacemaker responsiveness 386
Pancreatic acinar cell 173, 413, 476
Pancreatic B cells 443
Pancreatic β cells 260
Parathormone 339
Parathyroid hormone (PTH) 577
Parathyroid-hormone 516
Patch clamp 185, 217, 223, 280, 287, 465, 481, 492, 506, 539, 609
Patch clamp whole-cell 207
Patch perforated cells 31
Patch-clamp 159, 173, 260, 393, 410, 427
Patch-clamp technique 347, 397
PC12 cells 458
PCO_2 55
Perforated patch method 198
Permselectivity 481
Pertussis toxin 364
P-glycoprotein 347
pH 492
pH effects 280
Phase difference 413
pH-dependent Ca^{2+} transport 339
Pheochromocytoma cells 458
Phorbol 12-myristate 13-acetate 9
Phorbol ester 476, 577
Phosphatase inhibition 614
Phosphatases 397
Phosphate transport 211
Phosphodiesterase cAMP 3
Phosphorylating treatments 198
pH-sensitive fluorescent probe 9
Pinacidil 185
Pituitary cells 31, 98
Plasma membrane 173
Plasminogen activator 332
Plasticity 418
Polyvalent cation, protamine 476
Pontine tegmentum 273
Pore mutations 354
Pore or P-type inactivation 354
Potassium accumulation 371
Potassium channel 185, 267, 280, 617
Potassium conductance 151, 410
Potassium conductances 98
Potassium current 267, 287
Prazosin 273
Pressure-overload hypertrophy 599
Primary cultures 112
Primidone 499
Probenecid 499
Prostaglandin E_2 577
Protamine 476
Protein kinase A 84
Protein kinase blocker 193
Protein kinase C 458, 476, 577
Protein kinase inhibitors 325
Protein phosphatase 31
Protein phosphatases 325
Psychotropic agent 536
PTH 577
Purinergic receptor 295
Purkinje fibers 380, 614
Pyrilamine 84

Q

Quantal release 129
Quinacrine 120

R

Rapid exchange of solution 609
Rectification 98
Rectifier K^+ current 267
Rectifying Cl^- channel 159
Rectifying K^+ current 31
REM sleep 273
Renal basolateral membrane 339
Renal outer medulla 233
Renal proximal tubule 55, 60
Renal proximal tubule S2 segment 60
Renal proximal tubule S3 segment 55
Renal reabsorption 499
Renal tubules 523
Resting membrane potential 287
Rheogenic $Na^+ - HCO_3^-$ cotransport 60
Right ventricular pressure 599
Riluzole 536
Ro 20-1724 577
Rostral ventrolateral medulla 93
Ruthenium red 472

S

Sarcoplasmic reticulum 472, 599
Saxitoxin 90
Secretory epithelial cells 539
Selective brain cooling 168
Sensory neurons 287
Serotonergic effects 93
Single channel 427, 465
Single channel conductances 198
Single electrode voltage clamp 305
Single site in K^+ pores 354
Single-cell measurements 523
Single-channel activities 287
Single-channel conductance 260
Site-directed antibody 449
Site-directed mutagenesis 90
Skeletal muscle 185, 332, 404, 472
Skeletal myogenesis 207
Sleep 273
Sleep/waking cycle 273
Slow potassium channels 536
Small intestine 211
Smooth muscle 24, 105
Smooth muscle cells 393, 397, 564
Sodium current 267
Sodium loading 233
Sodium-activated potassium current 287
Solution exchange, patch clamp 609
Somatostatin receptors 98
Spinal sympathetic outflow 93
Splanchnic nerve 558
Spontaneous activity of channels 143
Sr^{2+} 427
Staurosporine 364
Steroidogenesis 204
Stilbenedisulfonic acid derivatives 436
Stimulus/response coupling 245
Stretch-activated cationic channels 393, 397
Stretch-inactivated channels 393
Subcellular gradients 245
Sulfonylurea 617
Superoxide dismutase 404
Surface charge 476
Sweat ducts 151
Sympathetic innervation 558
Sympathetic neurons 305
Sympathetic withdrawal 386
Sympathoexcitatory drive 93
Synaptic release 129
Synchronization, Ca^{2+}-oscillations 413
System, y^+ L 87
System y^+ 87

T

Tachycardia 386
Tail current 371

T-cell early antigen gene 87
TEA 407
TEA enhancement of current 354
Temperature, elevated 506
Tetraethylammonium 31, 443
Tetraethylammonium Apamin 223
Tetraethylammonium ions 609
Tetrodotoxin 90
Tetrodotoxin-inhibitable Na^+ channel 267
Thapsigargin 40, 552
Thimerosal 173
Thiocticacid 499
Thiolreagent 173
Thyrotropin-releasing hormone 31
Tolbutamide 260
Transepithelial transport 112
Transmembrane currents 552
Transmitter release 129
Transphosphorylation 316
Treppe, negative 599
Trigeminal neurons 287
Trivalent cation, La^{3+} 476
Trypsin 617
T-tubules 371
Tumour promotor agents 40
Tympanic temperature 168

U

Up-regulation of g_K 546
Urinary bladder 3
Ussing chamber 159
Uterine contraction 24
Uterus 24, 401

V

Vascular endothelial cells 56
Vascular reactivity 564
Vasoactive intestinal peptide 577
Vasoactive intestinal peptide (VIP) 577
Ventricular cell membrane 280
Ventricular cells 371
Ventricular myocardium 16
Ventricular myocytes 325, 436, 530, 617
Ventrolateral medullary neurons 93
Verapamil 105, 347, 481
Vestibular hair cell 407
Villus 570
VIP 577
Vitamin D_3 211
Voltage clamp 198, 267, 305, 325, 536
Voltage dependence 492
Voltage-clamp techniques 458
Volume regulation 347, 492
Volume-activated chloride channels 347

W

Water flow 3
Whole-cell recording 458

X

Xenopus laevis oocytes 211

Z

Zinc 90
